

Groundwork in partnership with ENWORKS is providing a free weekly newsletter for businesses to stay up to date with environmental regulations and legislation called **Green Intelligence**. This will be replacing the previous monthly Search & Send service.

The updates will be sent via email through the Green Intelligence website. **When invited to use the system you will need to confirm your details and click sign up.**

It's a simple and efficient process that will benefit your business by staying up to date with current issues.

Please return completed form to Melanie McLachlan by fax on **01606 723170**.
